ABOUT ME

I'm an enthusiastic Computer Science and Engineering graduate with a solid foundation in algorithms, data structures, and object-oriented programming principles. Experienced in computer graphics programming, with a strong understanding of rendering techniques and graphics libraries such as WebGL. I'm excited to apply my skills to working on impactful projects.

EXPERIENCE

Research Papers:

- A Study on Benchmark Datasets for Human Disease Genes.
- Comparative Analysis of Deep CNN Models in the Classification of Pulmonary Diseases.

University Projects:

- 3D Graphics Design: A Reading Room

- A table, a chair, some books and a pen holder were designed illuminating light and shadow effect using ThreeJs and WebGL.
